

Configuration Management — Handoff to Member 5

From: Member 4 — Md Sharior Omar Fahim (ID 63909), GitHub & Configuration Management **To:** Member 5 — Report Compilation & Presentation **Project:** Development and Deployment of a Learning Management System (LMS) for Online Education (Project #6) **Date:** 30 May 2026

1. What's in this package

Item	Formats	Purpose
Configuration Management section (Section 7)	<code>.docx</code> · <code>.pdf</code> · <code>.md</code>	The written report section. The <code>.docx</code> and <code>.pdf</code> are drop-in ready — formatted tables plus all eight screenshots embedded as captioned Figures 7.1–7.8
Evidence images	<code>screenshots/01..08-*.png</code>	The eight figures (7.1–7.8) at full resolution
This handoff note	<code>.docx</code> · <code>.pdf</code> · <code>.md</code>	Captions, placement guide, and repository link

Using Microsoft Word? Open the Section 7 `.docx` directly — it already contains the full section text, the formatted tables, and every screenshot embedded as a captioned figure, ready to paste into the final report. A `.pdf` is included for quick viewing and a `.md` copy for plain-text editing.

2. GitHub repository (live)

URL: <https://github.com/mdsharioromarfahim63909-lab/LMS-Project-Plan>

- **Public** — accessible to the instructor, no login required.
- Contains all member deliverables, the CM section, and the eight screenshots.
- Default branch `main`, with a `feature/cm-documentation` branch that was created and merged

back (demonstrates the branching workflow). See the **Commits** tab for the full history.

Please include this URL in the final report (e.g., in the Configuration Management section and/or the references/appendix).

3. Where the report section goes

Insert the **Configuration Management section** document as **Section 7 — Configuration Management**, immediately after Member 3's **Risk & Issue Management** (Section 6). It already contains subsections **7.1–7.7**:

- 7.1 Configuration Management Overview
- 7.2 Configuration Management Process
- 7.3 Repository Structure
- 7.4 Version Control Evidence (includes Table 7.1 — key commits)
- 7.5 Tools Used for Configuration Management (Table 7.2)
- 7.6 Benefits of Using GitHub for This Project
- 7.7 Screenshots (figure references)

4. Figures — captions & placement

All eight images are in the `screenshots/` folder. Insert them under **Section 7.7** (or as an appendix) using these captions:

File	Figure	Caption	Best placement
<code>01-repo-creation.png</code>	Figure 7.1	GitHub repository main page	7.1 / 7.7
<code>02-folder-structure.png</code>	Figure 7.2	Repository folder structure	7.3
<code>03-commit-history.png</code>	Figure 7.3	Commit history showing multiple commits	7.4
<code>04-commit-detail.png</code>	Figure 7.4	Commit detail showing file changes (diff view)	7.4
<code>05-branches.png</code>	Figure 7.5	Branch usage (<code>main</code> + <code>feature/cm-documentation</code>)	7.2 / 7.4
<code>06-readme-rendered.png</code>	Figure 7.6	README rendered on GitHub	7.3
<code>07-file-upload-evidence.png</code>	Figure 7.7	Member files visible inside <code>docs/</code>	7.3
<code>08-contributors.png</code>	Figure 7.8	Contributor activity	7.4

5. Commit history (evidence summary)

The repository's `main` branch records the full version-control history, including a branch-and-merge. Key commits (newest first) — see the live **Commits** tab for the complete list:

#	Commit	Message
10	67b2999	Add Member 1 name and ID to README team table
9	72ce9c4	Add version control screenshots for report appendix
8	bca0660	Update README to link the configuration management section
7	733fb6b	Add screenshots guide for version-control evidence
6	4b64a6a	Merge branch 'feature/cm-documentation' into main
5	129424a	(branch) Expand CM section with evidence table, tools, and benefits
4	ac1cb6b	(branch) Add configuration management section (Section 7) — initial draft
3	22c4e66	Add project README with overview, team roles, and structure
2	cf11b87	Add member deliverables: Introduction, Planning, and Risk Management
1	b3e9f1c	Initialize repository structure and .gitignore

6. Deliverables checklist (all complete)

- ☒ GitHub repository created and public
- ☒ README with project overview, team table, and structure
- ☒ All member files organised in `docs/`
- ☒ Multiple commits with meaningful messages
- ☒ A branch created **and** merged (`feature/cm-documentation`)
- ☒ Written Configuration Management section (Section 7)
- ☒ Eight version-control screenshots captured and labelled (Figures 7.1–7.8)

Prepared by Member 4 — Md Sharior Omar Fahim (63909). Questions? Happy to clarify anything.
